

Find the best fares quickly and precisely

e-Pricing ...

... offers the agent unbeatable pricing options with low fares anywhere in the world.

This function – the world's leading Low Fare Shopping technology – lets agents at travel agencies or corporate travel centres find the cheapest available flight fare for the passenger quickly.

A huge choice of low fares and flight combinations in a matter of seconds

Demand for cheap flights and the best journey routes is now significantly greater amongst passengers, and the range of sources and channels offering them is also increasing by the day. Now, "e-Pricing" provides you with the perfect technology for finding the cheapest fares quickly with one entry. The function carries out a search of all scheduled fares, including airline and agency private fares, direct from your desktop, and without the need to switch systems or to other websites.

Flexible, exact and cost-effective fare search

The new "e-Pricing" function searches millions of fares and 100.000 journey routes worldwide to offer you the widest possible selection of available cheap fares.

An overview of the benefits to you:

- Rapid listing of vacancy-checked price and flight offers saves you time
- Low training costs – existing input formats remain the same
- Screen displays/classification remain unchanged
- Availability and fare display at a glance
- Rapid reply times
- Efficient pricing builds customer loyalty
- The perfect solution for call centres

You can expect to find the following features:

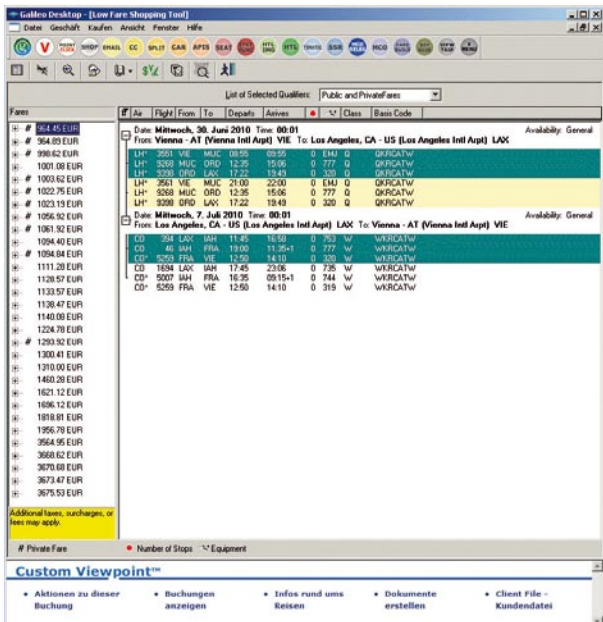

- Search through millions of fares and connecting flights worldwide
- Automatically searches for cheapest available offer
- Offers can be compared with or without an existing booking
- Comprehensive search criteria
- Display includes taxes
- Latest technologies let you make cheaper, more extensive offers than ever before
- Ideal for leisure, corporate and online travel

See next page for further details.

e-Pricing can be used with the following applications
