Neutral Availability allows you to view low cost carriers together with traditional GDS airlines in ONE search

Through our new Travelport API connector we can directly link ticketless airlines into the Galileo host environment to provide agents with real-time availability and pricing data.

This enables agents to efficiently search and book low cost flights alongside more than 450 airlines, 28,000 car rental locations and 83,000 hotels already participant in the Galileo GDS.

Faster, more reliable and hassle-free

Over 4 times quicker compared to booking on low-cost carrier websites. Speedy overall booking process gives the agent the opportunity to service more customers in less time.
